SHERWOOD NURSERY CO.

Evergreens - PROPAGATORS AND GROWERS
WHOLESALE

SPRING 1948
FALL 1947

TELEPHONES:
LANCASTER 6653 — VENICE 8533
141 S. E. 65TH AVENUE
PORTLAND 16, OREGON

TERMS AND INFORMATION

THE SHERWOOD NURSERY CO. are leading propagators and growers of conifers and broad leaved evergreens. Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about April 1.

TERMS:

Our terms are **NET CASH**. Note carefully the following conditions.

1. We **PAY SHIPPING COSTS** on lining out stock to all points in the United States, Canada and Alaska. Lining out stock for this purpose is defined as any stock not listed as B&B, specimen, or BR.
2. At least **ONE-FOURTH** of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full in advance required on all B&B and BR shipments.
3. The prices quoted are **NET CASH PRICES** but five per cent discount will be deducted from the list price of all lining out stock when delivery is made at our nursery.
Prices on our B&B stock are F.O.B. our Portland Nursery, at Southeast 73rd Avenue and East Burnside Street.
POSITIVELY NO ORDER for lining out stock will be accepted for less than 25 plants of the same size and variety.
Prices quoted in the 10, 100, or 1000 lots apply to **ONE SIZE** and **ONE VARIETY** only.
We reserve the right to substitute grades when necessary and the difference is not too great.
Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate.
B&B signifies balled and burlapped. BR signifies Bare Roots.
4. The prices quoted herein will hold only throughout the coming nursery year.

PACKING:

No packing charge is made.

Many small balled grades can be shipped safely, packed BR (Bare Roots) in moss thereby cutting down shipping costs. Where this can be done we have so indicated.

Our method of packing insures the arrival of plants in perfect condition at any place in the United States, Canada and Alaska.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner. **WE MAKE NO GUARANTEE**, either expressed or implied, that the plants will grow or give specific results. **ALL SHIPMENTS ARE MADE AT THE RISK OF PURCHASER AFTER BEING DELIVERED TO THE CARRIER IN GOOD CONDITION.** We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD NURSERY COMPANY

141 S. E. 65th Ave., Portland 16, Oregon

TO REACH PROPAGATING NURSERY:

Drive east on East Burnside Street to Southeast 73rd Avenue.
Nursery is reached in a fifteen minute drive from the center of city.
General Nursery is located at Sandy, Oregon.

Sherwood Nursery Company pays all shipping costs on lining out stock to all points in the United States, Canada and Alaska. We pay all packing costs. Our terms are net cash. At least one-fourth of the purchase price must accompany all orders, balance C.O.D. Payment in full in advance required on all B&B and BR shipments.

— GENERAL LIST —

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

Abelia (Edward Goucher)

A choice upright abelia similar to grandiflora but with foliage of richer coloring especially in the fall when it takes on a lovely bronze cast. The abundant flowers, which cover this hardy evergreen all summer and fall, are deep pink shading to a soft lavender and mingle in perfection with the full fine foliage. Height 5 to 6 feet.

Abelia grandiflora (Glossy Abelia)

Foliage glossy green, flowers white with pink blush. A beautiful, hardy evergreen. Splendid for foundation and mass plantings. Blooms all summer and is an attractive shrub both in flower and foliage. After the flowers have fallen the persistent purplish sepals are still attractive.

8-18 inches once transplanted.....	12	96
------------------------------------	-------	-------	----	----

Abelia grandiflora sherwoodi (Sherwood Dwarf Abelia)

A dwarf abelia, not only the plant but the leaves and the flowers as well being about half the size of grandiflora. Flowers pink and white, same as grandiflora. Thick-branching and very compact. A choice little plant, especially where space is a factor, supplying a long felt need. Originated by us and has proven a great favorite.

Abies balsamea (Balsam Fir)

A conifer of symmetrical, pyramidal growth. Has fairly dense foliage of aromatic properties and believed by some to possess medicinal value. Needles are short and thick. Hardy to Labrador.

12-15 inches twice transplanted.....	12	96
--------------------------------------	-------	-------	----	----

Abies magnifica shastensis (Shasta Red Fir)

A stately, symmetrical, bluish green tree of great beauty. Native of the mountains of southern Oregon and northern California where it decorates many a high slope or ridge. Branches horizontal in regular whorls. Needles mostly upright, short, close set.

18-24 " " " ".....B&B	1.00	9.00

Abies nobilis (Noble Fir)

The name noble describes this magnificent tree perfectly. A native of the Coast and Cascade mountains of western Washington and Oregon where its dignified appearance is set out in striking effect. The branches grow in whorls with great regularity along the main stem of the tree and are broadly spreading toward the tips. The foliage is usually a beautiful bluish green in color. It is valuable for landscaping purposes and the best of all for the production of Christmas trees. Very hardy.

Ajuga reptans rubra (Purpleleaf Bugle)

A worthy rock plant and ground cover. Has a rich green, slightly bronzed foliage, which is heavy and cleaves close to the ground. The blue flower spikes are 6 inches tall, are numerous and appear in the spring. There is the impression of pleasing and perfect harmony between blossoms and foliage. Evergreen.

1 year plants.....	6	48
--------------------	-------	-------	---	----

Arborvitae—See Thuja, Thujopsis**Arbutus unedo** (Strawberry Tree)

A spreading shrub with rich evergreen foliage. Has many charming, pearl white, bell shaped flowers followed in the fall by brilliant red strawberry like fruits. Does well in sun or partial shade and is drought resistant.

5- 6 feet three times transplanted.....B&B	6.50	58.50
--	------	-------	-------	-------

Arctostaphylos patula (Greenleaf Manzanita)

An irregularly branched, yet nicely rounded and shapely broad leaved evergreen. Height 4 to 5 feet. Needs little pruning as the natural growth gives the impression of tailored shrub. The bark of the stems is smooth, rich brown and mahogany in color. The leaves are about 1 inch in diameter, almost perfectly round, and have a delightful appearance of freshness summer and winter. Is most impressive when it grows in masses, as it grows on the slopes of the Oregon mountains where it is native. Leaves retain their refreshing verdant greenness under exceedingly dry and trying conditions. Here is a shrub of great beauty, and one which survives great extremes of heat, cold and drought without injury.

Arctostaphylos uva-ursi (Kinnikinnick)

Sometimes called Bearberry. Uva, Latin for grape, ursi for bear. A lovely low trailing evergreen, flourishing in a wide range of latitude and altitude. In Oregon it is at home from the splash of the waves of the Pacific to timberline in the Cascade mountains. Withstands almost any degree of cold. Has large red berries, roundish glossy leaves and grows in thick masses, completely covering the ground, rocks, walls or old logs over which it trails. Exempt from pests, good the year round and in every respect decidedly pleasing and satisfying. Considered by some to be the best ground cover known.

	Each	10	100	1000
2- 6 inches once transplanted.....	\$	\$	\$ 10	\$ 80

Aucuba japonica (Greenleaf Aucuba) (Pollenizers)

Male plants. Aucubas never bear berries unless pollenizers are planted with them. The large red berries are one of the attractive features of Aucubas and it is therefore essential to plant the pollenizers. The foliage is fine solid deep green. Shade loving evergreen.

4- 5 feet three times transplanted (Heavy).....B&B	3.75	33.80
--	------	-------	-------	-------

Aucuba japonica nana (Dwarf Aucuba) (Female)

This is a dwarf form with lustrous green leaves and a profusion of bright scarlet berries borne in clusters making a combination of surpassing beauty. Appeals to everyone. Hardy at Ogden, Utah. Comparatively new and rare, but certain to find a place in many gardens. Like the other Aucubas, it is dioecious and the male plants must be planted with the females to produce fruit. Shade loving evergreen.

The 9-12 and 12-15 inch grades can be handled bare roots. If so ordered deduct 10 cents per plant.				
30-36 inches three times transplanted (Heavy)....B&B	3.25	29.30

AZALEAS**Azalea amoena coccinea**

A splendid dwarf evergreen azalea. Foliage dark, glossy, compact. Flowers bright red completely covering the plant. A wonderful addition to our broad leaf evergreens. It is similar to the hinodegiri crimson azalea but very much hardier.

2- 4 inches once transplanted.....	10	80
4- 8 " " " ".....	12	96
8-12 " " " ".....	16	128

Azalea hinodegiri (Crimson Azalea from Cuttings)

Dwarf, very compact, evergreen azalea. Heavy glossy foliage, hardy in western Oregon. When in bloom the plant is completely covered with bright red flowers, so that the foliage is hidden. One of the most showy and one of the most popular dwarf ornamental shrubs.

Azalea macrantha

Compact, low growing with dark evergreen foliage. A very profuse blossomer. Late season blooming. Flowers red salmon.

1- 4 inches once transplanted.....	10	80
------------------------------------	-------	-------	----	----

Azalea maxwelli (Maxwell Azalea)

Foliage heavy and luxuriant. Plant rather low growing and spreading. Flowers extremely large, carmine red, completely covering the plant. One of the finest of all azaleas. Maxwell Azalea, because of its superb habit of growth, splendid foliage and gorgeous display of blooms, undoubtedly ranks in a class by itself among lovely evergreens.

2- 4 inches once transplanted.....	10	80
4- 8 " " " ".....	12	96
8-12 " " " ".....	16	128

Azalea sherwoodi (Sherwood Orchid Azalea)

This is a hybrid hinodegiri and our own introduction. We have been growing it for several years in our nursery where it has attracted much attention. Foliage about the size and gloss of the Hinodegiri Crimson Azalea but the plant is hardier. Flowers are a clear lavender with speckled throat, completely cover the plant and are large for a dwarf azalea.. This evergreen fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden. Mass plantings in gardens or on slopes and terraces are unexcelled.

Barberry—See Berberis

Bearberry—See Arctostaphylos

Beargrass—See Xerophyllum

Berberis darwini (Darwin Barberry)

A native of South America from Chili to Patagonia. Evergreen, reaching a height of about 3 feet. Foliage is deep green, glossy, and compact, and the small, neat leaves are serrated and holly-like. In early spring the plant is a gorgeous mass of tiny, bright, orange-colored flowers. Very decorative.

Camellia japonica (Cheerful)

Camellia in commemoration of George J. Karmel or Camellus, a Jesuit who traveled in Asia in the 17th century. The camellia holds a place right up in the front ranks among flowering trees. The superb, waxy rose like flowers are loved by everyone, are fine when on the tree or as cut flowers. Leaves are large, of intense, waxy glossy surface and make just the right setting for the wax like flowers which are splendid, double, perfectly shaped and bright red. A favorite.

Castanopsis sempervirens (Bush Chinquapin)

One of Oregon's wonderful native evergreens seldom offered to the trade. Unlike the tall growing form, Bush Chinquapin usually grows only 5 to 6 feet high in a spreading, much branched shrub. A plant 4 feet high will usually spread 4 to 6 feet. A stout medium sized evergreen of surpassing merit. It grows in its native state at 2000 to 4000 feet elevation but is at home at sea level. In our mountains it sometimes covers dry open slopes where only the hardiest plants can survive the summer's heat and winter's cold. Is also found in open woods with partial shade. Foliage very dense. Leaves dark green above, russet beneath. Flowers in white clusters followed by chestnut like fruits. Bush Chinquapin is a fine foundation shrub, also good for hedges and borders. It is unexcelled for large banks and terraces. A fine addition to the trade.

4- 6 inches once transplanted.....	11	88
6-12 " " " "	15	120

Ceanothus velutinus (Mt. Balm, Sticky Laurel)

A very hardy broad leaf evergreen, attaining a height of about 6 feet and a spread of 12 feet. Has bright green, medium size leaves which possess a strong aromatic odor. Thrives in dry rocky soil and in hot or cold exposures. Has terminal clusters of soft white blossoms.

12-15 inches twice transplanted.....B&B	.65	5.90
15-18 " " " "75	6.80
18-24 " " " "90	8.10

Cedar—See Libocedrus

CHAMAECYPARIS**Chamaecyparis lawsoniana** (Lawson Cypress)

A conifer of most satisfying effect, both in stately habit of growth, dense limbs and graceful foliage. Not hardy in areas of extreme cold, but fortunate, indeed, are localities which can grow this handsome tree. It is fine when grown in somewhat open or well spaced rows, and is equally good when grown as single specimens, needing no supporting plantings to enhance its beauty. Native of the Oregon coast.

2- 3 feet three times transplanted.....B&B	1.20	10.80
3- 4 " " " "	1.80	16.20

Chamaecyparis lawsoniana cerula

One of the fine Lawson variations, of which there are several. Slender and upright, the branches all growing vertical and very close to the trunk of the tree. As slender as a Pyramidal Arborvitae or Irish Juniper and needs little pruning. As indicated by the name, the foliage is of a deep sky blue or azure in color. The columnar form of the alumi cypress and very desirable where slender trees are needed.

	Each	10	100	1000
4- 8 inches once transplanted.....	\$	\$	\$ 12	\$ 96

Chamaecyparis lawsoniana erecta aurea (Gold Column Cypress)

Beautiful golden form of the Green Column Cypress which it is like in all ways except color. An extremely golden evergreen the year round. The golden color is most pronounced during the winter months. Rare.

4-10 inches once transplanted.....	11	88
------------------------------------	-------	-------	----	----

Chamaecyparis lawsoniana erecta glauca (Blue Column Cypress) (Alumi)

A cone shaped cypress erect in growth and with vertical foliage of turquoise blue. It is a valuable help in landscape plantings and for that reason is always a popular tree.

6-10 inches once transplanted.....	12	96
------------------------------------	-------	-------	----	----

Chamaecyparis lawsoniana erecta viridis (Green Column Cypress)

A pyramid of living green which will add life and freshness to any planting. A striking conifer with dense vertical foliage.

6-10 inches once transplanted.....	12	96
------------------------------------	-------	-------	----	----

Chamaecyparis lawsoniana fletcheri (Fletcher Cypress)

A narrow pyramid in form, very neat and tidy. Compact in growth with full soft appearing foliage of blue-green color effect. On account of its erect, close habit of growth it is especially well adapted to small homes and grounds where space must be conserved. It is a tree that is pleasing in every detail.

4- 6 inches once transplanted.....	10	80
------------------------------------	-------	-------	----	----

Chamaecyparis lawsoniana globosa (Sherwood Globe Cypress)

This conifer has much the same green dense, pendulous foliage of the ordinary Lawson Cypress. The difference is in the shape which is a very broad pyramid or giant globe, decidedly unusual. A rapid grower which stands almost any amount of pruning and so lends itself well to home grounds and hedges. The great beauty of the tree, however, is seen when it is allowed to develop into a specimen.

3- 4 feet three times transplanted.....	B&B	2.00	18.00	162

Chamaecyparis lawsoniana lutea (Golden Lawson Cypress)

Dense golden cypress. The foliage is very heavy, while the tree itself is a broad symmetrical pyramid, branching close to the ground. A trim, handsome ornamental, giving the impression of an individual well dressed and groomed, and with the minimum amount of attention. Golden color throughout the year. Resembles Westermann Cypress. Height 12 to 15 feet or more.

18-24 inches three times transplanted.....	B&B	1.50	13.50
30-36 " " " " ".....	B&B	2.10	18.90

***Chamaecyparis lawsoniana stewarti* (Wintergolden Cypress)**

Rather slender golden tree. Foliage erect with pendulous tips toward the top of the tree. One of the most remarkable and most admired of conifers, always attracting attention. Stately in habit, with green and gold foliage of most effective contrast. Hardy.

Each	10	100

Cryptomeria japonica nana (Dwarf Cryptomeria)

Light green, hardy, very compact globe, extremely dwarf. Fifteen year old trees are only 3 feet in height. Rare.

2- 6 inches once transplanted.....				12	96
------------------------------------	--	--	--	----	----

Cunninghamia lanceolata (Chinese Fir)

A native of China. The needles grow in two rows along the stem, are lance shaped, flat, very pointed and attain a length of 1½ to 2½ inches. The foliage is green and bronze and the glossiest of any conifer with which we are familiar. An irregular pyramid, an aristocrat. Especially good for large plantings. Hardy.

4- 6 inches not transplanted.....				10	80
6-12 " " " " ".....				12	96
12-18 " " " " ".....				15	120

Cupressus arizonica (Arizona Cypress)

A tree of slender upright habit of growth which thrives in poor soil and under adverse conditions. Foliage is of silvery gray appearance, good for contrast effects.

2- 3 feet three times transplanted.....	B&B	1.20	10.80
3- 4 " " " " ".....	B&B	1.80	16.20
4- 5 " " " " ".....	B&B	2.10	18.90

Cypress—See Chamaecyparis, Cupressus

CYTISUS (BROOMS)

See also Genista

Cytisus multiflorus (White Spanish Broom)

Shrub to 6 feet with slender, erect branches. Flowers are white with slight blush. Blossoms in May and June.

6 feet four times transplanted.....	B&B	3.25	29.30
-------------------------------------	-----	------	-------	-------	-------

These are fine extra heavy specimens.

Similar to the White Spanish Broom but smaller growing.

Heavy specimens.

A tall rapid grower possessing yellow flowers.

3- 4 feet three times transplanted.....B&B	1.25	11.20
--	------	-------	-------	-------

Sometimes called Moonlight Broom. Branches are heavy and numerous long and pendulous. Hardy, graceful, evergreen shrub. Flowers rich cream in color, completely covering the branches. A most pleasing and attractive shrub. Begins flowering heavily at an early age. Of garden origin. Height 5 to 6 feet.

4- 5 feet four times transplanted.....	B&B	3.00	27.00
--	-----	------	-------	-------	-------

Hardy dwarf, evergreen broom growing to 3 feet in height. Grows into a compact globe without pruning. Profuse bloomer. Flowers brilliant yellow, completely covering the plant. Fine rockery shrub. Rare.

3- 4 feet twice transplanted.....	B&B	2.00	18.00
-----------------------------------	-----	------	-------	-------	-------

A dwarf procumbent shrub, growing to 2 feet and bearing attractive purple flowers in profusion. Well leaved making it attractive in both leaf and blossom. A plant that is new and decidedly different among brooms. Native of south Austria and northern Italy. One of the hardiest. Very effective in mass plantings.

18-24 inches once transplanted.....	13	104
18-24 inches spread twice transplanted BR specimen....	.50	4.40	39
24-30 " " " ".....	.65	5.80	51

Grows about 3 feet tall with a spread of 6 to 8 feet, making it very desirable for bank plantings. Foliage is dense. Flowers are of tri-color effect in blending of bright garnet red, rose and ivory. The color effect at a distance is rose flecked with garnet. A most profuse bloomer and unexcelled in its class. Hardy.

4- 5 feet spread three times transplanted.....B&B	1.50	13.50	122
---	------	-------	-----	-------

Flowers are red with some bronze and pink mixed in. There is very little yellow and the general effect is dark red. Bushy erect growth, heavy bloomer. Hardy. Of English origin.

6 feet four times transplanted.....	B&B	3.00	27.00
-------------------------------------	-----	------	-------

Flowers are large, foliage extra good. There is a pleasing intermingling of crimson, cream and rose in the flowers, which are well displayed on somewhat open branches. The flowers are lighter than Dorothy Walpole. The general color effect is distinctly pink.

5- 6 feet four times transplanted.....	B&B	3.00	27.00
--	-----	------	-------

The plants in the above grade are fine extra heavy specimens.

Hedera helix arborescens (Bush English Ivy)

A broad leaved evergreen, with every appearance of ivy in bush form, but often having the ivy-like leaves twisted and contorted in an interesting manner. Does well in sun or shade. Reaches a height of 2½ feet and spread of 4 feet. Very hardy and desirable.

Each	10	100

Kinnikinnick—See **Arctostaphylos****Laurel**—See **Kalmia**, **Aucuba**, **Laurocerasus**, **Ceanothus****Laurocerasus lusitanica** (Portuguese Laurel)

A native of Spain and Portugal, Lusitania being the ancient name of the region almost coincident with Portugal. Grows into a tree in the land of its nativity, but farther north reaches the proportions of a fine shrub. Unexcelled among broad leaved evergreens for hedges. The older plants are magnificent when covered with a mass of spikes, 6 inches long, of white, fragrant blossoms in the spring. Dark green, glossy foliage, large leaves. A hardy strong growing plant which stands shearing well. A beautiful shrub especially when planted with other evergreens.

Thuja occidentalis (George Washington Arborvitae)

An exceedingly bright golden form, its rich golden foliage unchanging in color with the seasons. Similar in shape and color to George Peabody Arborvitae but much showier. It is full branched, well-formed and of graceful habit. Hardy. Rare.

4- 5 feet three times transplanted (heavy).....B&B	4.50	40.50
--	------	-------	-------	-------

Thuja occidentalis nana (Little Globe Arborvitae)

A dwarf of regular form. Foliage upright and grows in thick, heavy layers appearing to be packed together, and of good bright green color. Low growing, a mature tree reaching a height of 2 feet and spread of 3 feet, and presenting an aged appearance. Desirable wherever dwarfs are needed.

4- 6 inches once transplanted.....	10	80
------------------------------------	-------	-------	----	----

Thuja occidentalis wareana (Ware Arborvitae)

Sometimes called Siberian Arborvitae, which name it bears well because of its ruggedness and adaptability to cold climes. A tree of close, compact, heavy foliage which holds its deep green color of slightly bluish cast throughout the year. Symmetrical and conical in habit of growth. Not too large, being just out of the dwarf group, shapely, desirable for ornamental plantings.

4- 5 feet four times transplanted (Heavy).....B&B	5.00	45.00
---	------	-------	-------	-------

Thuja plicata (Giant Arborvitae)

A native of the northwest, quite generally distributed along the Pacific Coast from Oregon northward and to the westward slopes of the Cascade mountains. The trees are thickly limbed well to the ground except in dense woods, and the foliage is fresh and attractive at all seasons. It is a rapid grower under favorable conditions and grows into a symmetrical pyramid with little or no pruning.

	Each	10	100	1000
5- 6 feet three times transplanted.....B&B	\$ 2.50	\$22.50	\$	\$

Thujaopsis dolabrata (False Arborvitae)

Sometimes called Elk Horn because of the interesting and peculiar shape of the branchlets. It has heavy light green foliage of mottled effect. Pyramidal in form. Of oriental origin and regarded as one of the most beautiful of oriental conifers. Since it is different, it gives an added interest and beauty to garden plantings. Hardy into New England.

Umbellularia californica (Oregon Myrtle) (California Laurel)

A handsome hardy evergreen tree, 25 to 30 feet in height and reaching 75 feet. Native of southern Oregon and northern California where it reaches its greatest perfection of growth along the streams and valleys of the coast range. The tree is conical in form and the leaves are highly aromatic. Well adapted to hedges. Sargent has described the Myrtle as "one of the stateliest and most beautiful inhabitants of North American forests, and no evergreen tree of temperate regions surpasses it in the beauty of its dark dense crown of lustrous foliage."
